

PANTADOX

WATER SOLUBLE POWDER

Composition:

Each gram powder contains:

150 mg doxycycline hyclate
200 mg tylosin tartrate

Spectrum of activity:

Doxycycline is a tetracycline derivative, with bacteriostatic action against a large number of Grampositive and Gramnegative bacteria. It acts also against *Mycoplasma* spp., *Rickettsiae* and *Chlamydia* spp..

Tylosin, a macrolide antibiotic, is active against particularly Grampositive bacteria like, some Spirochetes (including *Leptospira*); *Actinomyces*, Mycoplasmas (PPL0), *Haemophilus pertussis*, *Moraxella bovis* and some Gramnegative cocci.

Indications:

Infections caused by micro-organisms susceptible to doxycycline and tylosin, especially infections of the respiratory tract and enteritis in calves, pigs and poultry.

Contra-indications:

Hypersensitivity to tetracyclines, serious renal- and/or liver dysfunctions, simultaneous administration with penicillins and/or cephalosporines.

Dosage and administration:

Orally via drinking water or calf-milk.

Calves: 100 g powder per 80 calves of 50 kg bodyweight, during 3 – 5 consecutive days.

Pigs: 100 g powder per 200 litres of drinking water, during 3-5 days.

Poultry: Prevention: 100 g powder per 300 litres of drinking water, during 3-5 days.

Treatment: 100 - 200 g powder per 150 litres of drinking water, during 3-5 days.

Medicated drinking water should be used within 24 hours.

Withdrawal time:

For meat: 15 days.

For eggs: 10 days.

Storage:

Store closed in a cool and dry place.

Shelf life:

3 years.

Presentation:

Sachet of 100 gram.

FOR VETERINARY USE ONLY
