

# TYLOCARE 200

## WATER SOLUBLE POWDER

**Composition:**

Each gram powder contains:  
200 mg tylosin tartrate

**Spectrum of activity:**

Tylosin, a macrolide antibiotic, is active against particularly Gram-positive bacteria like *Streptococcus* spp. and *Staphylococcus* spp. (including *Staphylococcus aureus*), some Spirochetes (including *Leptospira*); *Actinomyces*, Mycoplasmas (PPLO), *Haemophilus pertussis*, *Moraxella bovis* and some Gram-negative cocci.

**Indications:**

Prevention and treatment of infections caused by micro-organisms susceptible to tylosin, like Mycoplasma-infections (C.R.D., Synusitis, and enzootic pneumonia), enteritis (*Treponema hyodysenteriae*) and pneumonia infections (*Pasteurella multocida*) in cattle, pigs and poultry (broilers).

**Contra-indications:**

Laying hens.

**Side-effects:**

Pigs: Hypersensitivity reactions like oedema of the rectal mucosa, anal swellings and diarrhoea.

**Dosage and administration:**

Poultry: 1 kg powder per 400 litres drinking water for 2-5 consecutive days.

Calves: 5 g powder per calf through the drinking water or milk, twice a day, for 7-14 days.

Pigs: 100 g powder per 80 litres of drinking water, daily, for 10 consecutive days.

**Withdrawal time:**

For meat: 5 days.

**Storage:**

Store closed in a cool and dry place.

**Shelf life:**

3 years.

**Presentation:**

Sachet of 100 gram, plastic jar of 1000 gram.

**FOR VETERINARY USE ONLY**
