

SELVIT

ORAL SOLUTION

Composition:

Each ml solution contains:

0.50 mg sodium selenite
100 mg vitamin E

Spectrum of activity:

Vitamin E acts as an antioxidant. It prevents or slows formation of free radicals and hyper peroxides from polyunsaturated fatty acids. The decrease in peroxide formation can be considered as having a stabilizing effect on cell membranes containing poly-unsaturated fatty acids.

Selenium is necessary for growth and fertility and has an interaction with vitamin E that allows each to partially but not complete substitute for the other. Selenium also has antioxidant action

Indications:

Prevention or treatment of muscular dystrophy (White Muscle Disease, Stiff Lamb Disease) encephalomalacia, exudative diathesis, decreased hatchability of eggs, diminished fertility (embryonic death).

Dosage and administration:

Oral administration.

Sheep/goats/calves: 2-10 ml/animal

Poultry: 1litre/1000-4000 litres of drinking water during 6 days.

Medicated drinking water should be used within 24 hours.

Withdrawal time:

None.

Storage:

Store closed at 2- 8 °C, protected from light.

Shelf life:

2 years.

Presentation:

Plastic bottle of 1 L.

FOR VETERINARY USE ONLY
KEEP OUT OF REACH OF CHILDREN
